Brucke - 1130-1225 hours

17 July 1961

1. UJDRUM/UJDRUC/Meeting with BANANE in Berlin - FLEMING provided the information cabled per MUNI 6432. FLEMING also turned over five copies of a photo of UJDRUM and the photos hand carried by [] as reported in MUNI 6438. When [] suggested that it would be advisable for us to have the identity of BANANE, FLEMING was wildly reluctant. [] pointed out that it presumably would be desirable for us to run traces on BANANE and noted that we also had a fresh defector, in whom we had had an operational interest previously, who might possibly have information concerning BANANE - who appeared most probably to be under Eastern control. FLEMING then came up with the last name only which was all he knew off the top of his head. [] provided first and middle names and birth data subsequently by telephone.

3. UJDRUCSY and UJDRUM - FLEMING had an overview working paper and prepared covering the most interesting telephone calls made or received by UJDRUCSY, with particular reference to calls between UJDRUCSY and UJDRUM. He also turned over an affidavit to the Department of UJDRUM covering the years 1960 to July 1961.

FLEMING [] []

Brucke - 1505-1630 hours

17 Jul 1961

1. UJDRUM Surveillance - FLEMING received Yellow No. 22874, dealing with appropriate portions of BREF 4042. [] told FLEMING that the surveillance of the Hotel Fontaine appeared extremely difficult, that he would do his best to provide further coverage, but that it was uncertain just how much more could be done securely.

2. BANANE - [] showed FLEMING a copy of our letter sent to UPHILL as Yellow No. 22874 of 3 November 1960, based on STUN 0411, MUNI 6438, MUNI 6437, etc. [] said he found it impossible to believe that BANANE was not under hostile control. FLEMING said he had the same feeling but pointed out that the apparently good reports BANANE was producing. [] stated that this material by definition had to be authentic and checkable and indicated that the real question was why the East considered BANANE worth providing with such material. FLEMING said he had not as yet been able to get the case file on BANANE, but hoped to be able to see it shortly. He said he had determined that BANANE actually resided in West Berlin (Muenchensstr. 47, Vorderhaus, IV Stock) and only worked in East Berlin (in N. Aderschoenhansen) in a factory that produced vacuum lamp components. FLEMING said he thought it would be an excellent idea to have telephone tap on BANANE, if he has a telephone, on the off chance that it might be possible to pick up some indication of hostile control. (Comment) A check of a Berlin map indicated that there are no less than three Muenchensstr. in West Berlin and it will be necessary to determine where in West Berlin BANANE resides before attempting to lay on telephone coverage.

CONTACT REPORT

BERNHARDT, CYLINDR

☐ Home - 1520-1620 hours

1. UJDRUM Berlin Surveillance - ☐ mentioned that in view of the short notice and the difficulty of staking out the Hotel Fortinns, it had not been possible for BCT to provide any further surveillance coverage of UJDRUM. BERNHARDT said he could appreciate the difficulties that had been involved and hoped on the next go-round to be able to provide more advance warning. BERNHARDT said the surveillance report concerning UJDRUM's arrival appeared to have been well done and possibly the results were significant; UPHILL had not been able to identify the man who had met UJDRUM upon his arrival at Tempelhof - and it was certain that whoever met him was not an UPHILL or on official business. BERNHARDT said we would receive photos of various persons, including UPHILL, who might logically have met UJDRUM privately upon his arrival. BERNHARDT said that we could get the photos to Berlin as soon as possible so that they could be checked with the surveillance team to see if an identification could be made.

2. BAKANE - ☐ said that there were three different watchmen/receivers in West Berlin and that it would not be possible to attempt GALLING coverage of BAKANE until we know precisely in which sector of West Berlin BAKANE lives.

any idea just what UJDRUM's interest could be in SCHLOCKERMAN. FLATIN said that another funny point was that UJDRUM often came to Berlin on operational trips to Berlin. BERNHARDT opined that UJDRUM might not have any real ops interest in SCHLOCKERMAN and might just be fishing for a reaction to his claim of ops interest. BERNHARDT said he would be interested in anything we have on SCHLOCKERMAN.

11. Fun - BERNHARDT said he had seen some of the basic BI data, but that UJDRUM had been a bit of a problem in the possibility of taking up contacts with UJDRUM. BERNHARDT said that UJDRUM had various information on UJDRUM, including the fact that he was connected with the SRP and was alleged formerly to have had contact with a dropped UPHILL suspected of having Eastern ties. BERNHARDT said that neither UJDRUM nor GRAYLE had
